Moultonborough to Offer CSPA Seminar on June 20

With one of the largest amounts of shoreline frontage of any of the Lakes Region communities within its jurisdiction, the Moultonborough Code Enforcement Office gets plenty of questions about the impact of the Comprehensive Shoreline Protection Act. Effective July 1, 2008 the Act required a shoreline permit prior to initiating many types of construction, excavation or filling activities within the protected shoreland.

In response to a request from the citizenry the Town is sponsoring a presentation of the Comprehensive Shoreline Protection Act for area residents, contractors, developers, and other interested parties. The presentation is at the Moultonborough Academy Auditorium on Blake Road on June 20, 2009 at 10:00 A.M. No prior registration is required.

Jay Aube, Shoreline Specialist for the New Hampshire Department of Environmental Services will give a one hour presentation with questions and answers to follow. Karel Crawford, Chairman of the Moultonborough Selectmen said, "We appreciate the state and town staff taking time out of their weekend so that the presentations will be on a day when our many year round and seasonal residents are available to attend and benefit from this most important information."
